GitHub: <https://github.com/ArmaanM08>

### About Me:

Results-driven professional with a strong track record of turning complex challenges into clear, high-impact outcomes. I bring a blend of strategic thinking, ownership, and adaptability—quickly learning what matters, collaborating effectively across teams, and delivering work that moves business goals forward. Known for high standards, clear communication, and a bias for action, I thrive in fast-paced environments where thoughtful execution and measurable results matter.

### Experience:

**Codexa Infotech LLP:** (July 2026 – ongoing)

**Position:** Full Stack Intern

- Developed, deployed, and maintain the company's CRM and Employee Management System, supporting internal workflows and concurrent updates by 20–25 employees.
- Rebuilt backend pin-management logic and resolved production bugs for **Espy IDE**, an IoT block-based coding platform with Marathi-language support; implemented block search, multi-board support, and an output terminal.
- Built the backend from scratch for **Navrang Pustika**, an offline Windows Jupyter Notebook alternative supporting ML/basic Python libraries and Marathi; redesigned selected UI elements and packaged the app as a standalone Windows executable.
- Contributed to application compilation and packaging for **CodexBlocks**, a Marathi-language, voice-operated Scratch alternative.
- Lead 3–4 interns building frontend demos for client projects; coordinate upcoming backend integration across three projects.

**Parsewave** (Jun 2026)

**Position:** AI Benchmark Contributor (Trial)

- Designed and completed Terminal-Bench style benchmark tasks for AI agents in a structured evaluation environment.
- Developed deterministic task environments, automated validation workflows, and reproducible evaluation arti-facts for model assessment.
- Successfully completed a paid benchmark contribution that passed technical review and quality evaluation.

### Skills Summary

**Technical Skills:**

- **AI & Agent Systems:** OpenAI API, AI Agent Systems, Prompt Engineering, Agent Evaluation, Terminal Bench, T-Bench, Harbor, Workflow Design
- **React.JS, TypeScript, Node.js, Python**
- **REST APIs and FastAPI**
- **Cloud & DevOps:** AWS EC2, S3, VPC, Docker, Jenkins, Kubernetes
- **Databases:** MySQL, MongoDB
- **Git & GitHub**

## Engineering Projects

### 1. Sentinel-ML: AI Powered Business Analysis and Prediction System

Built a production ready AI-Powered Business Analytics system with easy-to-use UI, Multi-Data support and Dockerised form for portability.

**GitHub Link:** <https://github.com/ArmaanM08/SentinelML.git>

### 2. WikiDoCollab: AI Powered Document Collaboration Platform

Built an enterprise friendly AI-Powered Document Collaboration Platform with Notion like Interface and easier collaboration than Google Docs with version control.
